

Team It's Our Time

5 Questions

LEARN and USE the 5 Questions

1. Do you like to travel? YES or NO?

If you had the ability to save, up to 65% on all your travel, and could earn an additional 60% anytime anyone else you knew booked travel, does that sound like something that would be of interest to you? YES or NO?

2. You have a debit card, right? Would you agree that banking is one of the biggest businesses in the world?

If you had the opportunity, to earn a small percentage every single time someone did a banking transaction, would that be something that would be of interest to you? YES or NO?

3. And finally, if you had the ability to earn 2.5% per week passively, week after week, without having recruit anyone, would that be of interest to you? YES or NO?

Here's why I am asking you these questions:

In July 2019, two very wealthy people and myself came together to be the first people in the world to deliver a digital platform which offers people a private membership, where they will receive accesses to these VIP services.

#1 The ability to book your own travel and save up to 65% every single time you booked travel, while earning an additional 60% anytime anyone books travel on your travel site.

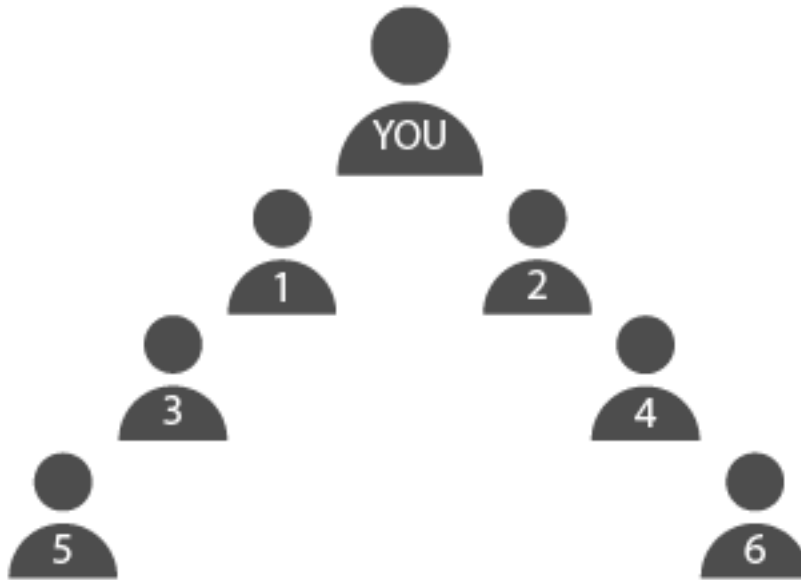

#2 You will receive your own private Currency Management Platform Account, with a 12 year old established bank in London, which will give you a debit card with many features, include crypto-currency banking.

#3 Earning passive income through micro loans. We allow you to provide a micro-loan as low as \$70 up to \$700,000 which allows you to earn 2.5 percent weekly interest on the micro-load you provided.

Based upon the little summary I just gave you, does that sound like something that would be of interest to you? YES or NO?

We are bringing these services to the marketplace right now through word of mouth distribution called Network Marketing. The exciting part is because every single time a person purchases a membership they must be placed into the tree structure. The tree structure obviously has a top and it has a bottom, so every time a person purchases a membership there are commissions that are paid out within that tree structure. It is my responsibility to lead the charge on this, and right now, I only have about 6 top spots in the tree structure. Our goal is to have over 50,000 memberships sold within the next couple of months. Anyone who takes one of these top 6 spots available will receive a percentage override of every single membership that is purchased from those 50,000 people that will be below them in the tree structure.

If I gave you a chance to have one of those top 6 spots, would you want your name on one of those spots? YES or NO?

To secure your spot you have a choice between the \$1,000 membership and the \$1,700 membership. The difference between them is with the \$1,700 membership you will receive the maximum benefits and maximum commissions from the services I mentioned vs. the \$1,000 membership where you would receive less.

Based upon what I just shared with you, which would be better for you, the \$1,000 membership or the \$1,700 membership where you earn the maximum commissions?
